4150

Final items for Sponsorship

Earlier this year we asked for sponsorship to help with funds in anticipation of our boiler going to Bridgnorth boiler shop for completion. This has proved very popular and the team are very grateful and encouraged by your support.

All items are permanent, very visible and can be identified from the platform.

Most items are already in our possession but are selected so sponsors can identify their part of 4150 each time she passes or is waiting at stations. All sponsors receive shares to the same value. All the items are also chosen for the permanency and visibility. This is an exhaustive list and a rare opportunity to sponsor a special piece of a Severn Valley engine and be a part of the final push.

Two large copper injector feed pipes in cab £300

Steam heat gauge £250

ATC bell and box. £450
